QUICK GUIDE

Be prepared to deal with spills quickly – have all Sanol® absorbents ready nearby to quickly stop oil spills from spreading further. Quickly lay a bilge or socks to reduce the area of the spill you need to clean and prevent harmful liquids from entering drains or impacting walkways. Ensuring your staff and customers safety by having the Sanol Booms on hand at all times.

- ABSORBENT MATERIAL: SANOL®
- CONTENTS: CARBON, NITROGEN, WATER, AMMONIUM PHOSPHATE
- NOTE: NON FLAMMABLE, DOES NOT BLEED - RETAINS ABSORBED FLUID

Sanol® Absorbent Bilge are the most absorbent of their kind, available and can be customized according to your size, length and material type requirements. Each bilge is lightweight and easy to deploy, you can wrap around leaking pipes or join together to make longer booms.

You can purchase absorbent boom, socks and bilges on their own or in our Spill Kits.

Useful for containing large oil spills and all type of spills such as: oil damage accidents in Lakes, Water Treatment Plants, Harbors, Factories, Gas Stations, Garages, or leak in industrial operations, and more.
